#### **Facility Responsibilities**

#### The facility agrees to:

- 1. Allow KDHE to conduct a CAV during normal business hours. The CAV may take multiple days depending on the size of the facility.
- 2. Complete all forms sent to the facility by the inspector before the CAV to the best of their ability.
- 3. Provide a minimum of one facility contact that will accompany KDHE during the entire CAV, and provide access to additional employees as necessary to complete a dotailed CAV.
- 4. Provide copics of all required documents for KDHE's review, and provide photocopies of necessary documents for the inspector to take with them for future reference.
- 5. Allow the inspector to take photographs (unless safety requirements prohibit this) at the facility to document discrepancies or to illustrate situations for future use.
- 6. Have all appropriate management personnel participate in the meeting at the conclusion of the CAV so that employees are aware that management supports and encourages the facility's compliance efforts.
- 7. Correct all discrepancies found during the CAV within the time frames established by the KDHE inspector. All discrepancies must be corrected and compliance achieved to KDHE's satisfaction within the timeframes established in the CAV inspection report in order to terminate the agreement. If a discrepancy cannot be corrected within the established time frame, the facility is responsible for contacting the KDHE inspector to obtain an extension. An alternate schedule may be approved by KDHE based upon justifiable circumstances explained by the facility as part of the request for extension.
- 8. Apply the knowledge learned from this facility CAV to all other facilities owned or managed by the company within Kansas.

#### Signatures

By signing this agreement, both the facility and KDHE specifically and expressly agree and acknowledge that this Agreement is entered into freely and voluntarily for the purposes of achieving and maintaining compliance with the hazardous waste regulations of the State of Kansas.

Re: Hazardous Waste Compliance Inspection of September 28, 1987

Dear Mr. Romig:

Thank you for your letter of October 22, 1987, which indicates you've taken action to correct deficiencies noted during the inspection.

During our telephone conversation on November 13, 1987, we discussed and answered your question regarding accumulating and storing hazardous wastes for a period longer than ninety (90) days.

Based on the information provided, your facility is in substantial compliance with state and federal hazardous waste regulations.

Your cooperation with the hazardous waste management program is appreciated. If you have questions concerning the inspection, please call me at the Northeast District Office in Lawrence at 913/842-4600.

Respectfully

Jim Fischer Environmental Technician Inspections and Enforcement Section Bureau of Waste Management

October 22, 1987

Department of Health and Environment Forbes Field Topeka, Kansas 66620-0001

Dear Jim:

K. D. H. E. NORTHEAST D'STPICT

OCT 2 9 1987

Thank you very much for your letter of October 7th and I will attempt to answer your list of recommendations and comments starting on page 2 of your letter.

1. <u>Container Marking:</u> We have marked the 30 gallon drum that was nearly full at the time of your visit with the lettering "Hazardous Waste". However, no date was put on this drum since I have no way of knowing when the accumulation started.

This drum is nearly full and we have a 55 gallon acceptable drum that has been painted yellow marked "Hazardous Waste" and the start-up date has been placed on the drum.

- 2. We have started a regular inspection of both of the drums and are documenting these inspections.
- 3. A few days after your visit, I received a catalog in the mail with signs and placards and immediately ordered a supply of the 10-1/4" square, red, placards marked "Flammable". These have been received and are on file.
- 4. I have designated one of our foreman to be responsible for the inspections and named him "Emergency Coordinator". He has been given copies of the applicable information as shown in the booklet of administrative regulations that you were kind enough to leave me.
- 5. The day following your visit, I completed the application form for an EPA identification number and sent this on to the attention of John Paul Goetz.

We have been isued EPA ID #KSD007136872.

Jim, I believe that we have complied with all of your recommendations. In addition to this, I have been in contact with Conservation Services, Inc. of Wichita and talked with Mr. Gilbert Perez concerning disposal of the waste that we are generating. I am also contacting Safety-Kleen to discuss with them the possibility of picking these wastes up at the same time they service our parts cleaner which we have on order through Bearing Headquarters in Kansas City.

I do have one question and that is, would we be permitted to accumulate these wastes for a period of longer than ninety days?

Our accumulation is minimal and the cost of disposal would be greatly reduced if we could accumulate this material until we had several drums.

I would appreciate very much hearing from you with any comments that you might have about the outline that we have taken in response to your recommendations and also in answer to my question concerning the accumulation.

With best wishes, I remain,

Sincerely,

1

im KARL A, ROMIG gf

i.

#### Summary

٤

1

#### Great Western Manufacturing, Inc.

This facility manufacturers sieves and sifters used in the flour industry. The facility was previously located at 208 Choctaw, Leavenworth and moved to their present location approximately one year ago. Wastes generated by the facility include:

- <u>Safety-Kleen Solvent</u> The facility has just signed a contract with Safety-Kleen and will be using one (1) 30-gallon parts washer. The washer will be located in the maintenance shop. Waste solvent was previously disposed in the trash or dumped on the ground.
- <u>Paint/Lacquer Contaminated Toluene</u> The facility has two (2) paint booths. One booth is used to spray clear lacquer on wooden sieve/sifter cases. The other booth is used to spray paint metal components. Toluene is used as paint thinner and for cleaning painting equipment. Paint wastes are being accumulated in a 30-gallon steel drum.

Previously paint wastes were disposed in the dumpster. The generator is in the process of contacting a hazardous waste management facility to pick up the waste thinner.

- 3. <u>Paint Booth Filters</u> Each paint booth contains 28 exhaust filters. Spent filters are disposed of in the dumpster. No heavy metals testing of the spent filters is required as FDA regulations forbid the use of such paints in the food industry.
- 4. <u>Used Oil</u> The facility has one (1) fork lift. Whenever the oil is changed, it is placed in the dumpster for disposal.

Gary K. Hulett, Ph.D., Under Secretary

Re: Hazardous Waste Compliance Inspection

Dear Mr. Romig:

1 2

On September 28, 1987, a hazardous waste compliance inspection of your facility was conducted by this department to determine compliance with state and federal regulations concerning hazardous waste.

The inspection revealed your facility generates the following hazardous wastes as defined by 40 CFR, Part 261, Subpart C as adopted by K.A.R. 28-31-3:

| Wastes Generated     | Waste Codes |
|----------------------|-------------|
| 1                    |             |
| Safety-Kleen Solvent | D001        |
| Lacquer Thinner      | D001        |
| 1 115                |             |

The quantity generated is more than 25 kilograms (approximately 55 pounds) but less than 1000 kilograms (approximately 2200 pounds) per month. Your facility is considered a Kansas generator and is regulated under K.A.R. 28-31-4 excluding K.A.R. 28-31-4(g) and K.A.R. 28-31-4(m).

As a Kansas generator, you must comply with the requirements outlined in the *Hazardous Waste Generator's Handbook* which was left during the inspection. Basically, these regulations require you to obtain an EPA Identification Number, manifest wastes shipped off-site, package, label, mark, and placard all containers, maintain records, and meet storage requirements. In addition, you must conduct personnel training and meet emergency response requirements.

The inspection identified the following items not in compliance with state and federal regulations concerning generators of hazardous waste:

#### STANDARDS FOR GENERATORS OF HAZARDOUS WASTE

#### Accumulation Time For Kansas Generators

1. <u>Container Marking</u>: Each container or tank must be marked clearly with the words "Hazardous Waste" and the accumulation start date in accordance with K.A.R.28-31-4(h)(1)(C and D).

The inspection revealed that your one (1) thirty (30) gallon drum of accumulated paint waste was not marked as required.

2. <u>Container Inspection</u>: A generator of a hazardous waste who accumulates such wastes in containers on site without a permit or without having interim status, for a period of (90) days or less, must inspect their containers for signs of leakage or corrosion and, in addition, these inspections must be documented. Refer to K.A.R. 28-31-4(g)(1) and (k).

The inspection revealed that you are not conducting documented weekly inspections of your hazardous waste storage container as required.

On the date of the inspection you were provided a sample weekly inspection log which you may modify for your respective requirements.

3. <u>Placarding</u>: The generator of a hazardous waste has the responsibility to offer the initial transporter the appropriate placards according to U.S. Department of Transportation regulations. Refer to K.A.R. 28-31-4(e)(4).

The inspection revealed that you do not have "Flammable" placards as required.

On the date of the inspection we discussed the sources for placards and the type of placarding required.

4. <u>Personnel Training</u>: Personnel training and emergency response requirements pertaining to Kansas generators must be followed as outlined in K.A.R. 28-31-4(h)(1)(E thru G) and (h)(2)(A thru E).

On the date of the inspection you were provided with a copy of the Personnel Training and Emergency Response Requirements.

#### EPA IDENTIFICATION NUMBERS

5. Notification: All Kansas and EPA generators shall apply for and obtain an EPA identification number from the department prior to generating, transporting, or treating. storing, disposing, offering for transportation, hazardous waste. A generator who has not received an EPA identification number may obtain one by applying to the department using a form supplied by the department. Whenever there is a change in the information originally submitted to obtain an EPA identification number, The generator shall update that information. These changes shall be submitted to the department on a form supplied by the department. K.A.R. 28-31-4 (c) (1).

The inspection revealed that you have not applied for and obtained an EPA Identification Number as required.

Great Western Manufacturing October 7, 1987 Page 4

> On the date of the inspection you were provided with a Hazardous Waste Notification Form. This form must be completed and submitted to the address shown, attention: John Paul Goetz.

Please take action to correct these deficiencies by November 10, 1987. Please notify our department in writing when corrected and please identify the corrective action(s) for each deficiency noted.

Safety-Kleen is currently picking up your waste solvent for recycling. This disposal method is satisfactory. You are in the process of arranging for a hazardous waste management facility to pick up your paint wastes. Until arrangements are made to pick up your paint wastes, you must accumulate these wastes on-site in an appropriately marked container. Please provide our department with a copy of the hazardous waste shipping manifest documenting shipment of these wastes.

Your cooperation with the hazardous waste management program is appreciated. If you have questions concerning this letter, please call me at the Northeast District Office in Lawrence at 913/842-4600.

Respectfully,

Jim Fischer Environmental Technician Inspections and Enforcement Section Bureau of Waste Management

## Re: Approved UST Repair Notification (UST009) Form: Casey's #2826, 2100 S. 4<sup>th</sup> St., Leavenworth, KS 66048 (Fac. ID #30435)

Dear Mr. Burghart:

I have reviewed and approved the "UST Repair Notification (UST009)" form for the underground storage tanks at the above referenced facility. The notification reports work to replace the syphon jet on U003.

K.A.R. 28-44-15 (b) (1) authorizes Licensed UST Contractors to make repair applications by telephone if the repair is essential to protect public health and the environment. In addition to using the telephone, Contractors may make contact with KDHE by fax or email when a repair is deemed necessary. Should repairs be made during non-work hours or on the weekend, the Contractor must make contact with KDHE on the first workday following that repair. After notifying KDHE of the repair, Contractors may submit the Repair Notification (UST009) forms up to 30 days following the completion of the work.

Please complete and return the following forms, failure to do so is a violation of K.A.R. 28-44-15:

• "UST Compliance Verification (UST004)" form to be filed after the work is completed. (Received on 6/4/2019)

KDHE has received the required forms and considers the application closed. Finally, if you have not already done so, arrange for a facility inspection with the nearest KDHE District Office. Thank you for your continued cooperation. Sincerely,

Enne John

Sean Kammerlohr Environmental Associate KDHE-BER-Storage Tank Section

Re: Facility 30435 CASEY'S GENERAL STORE - #2826 2100 S. 4TH STREET LEAVENWORTH, KS 66048

TANKS: 001,002,003

Attention Underground Storage Tank Owner:

The purpose of this letter is to inform you that KDHE has issued your 2018/2019 UST Operating Permits for the underground storage tanks (USTs) at the facility referenced above. However, since the printing of your UST permits, the USTs have fallen out of compliance. KDHE will not print 2019/2020 UST Operating Permits until these USTs are brought back into compliance.

Not having UST Operating Permits places you in violation of K.S.A. 65-34,109 (b) (6) and the federal Energy Policy Act of 2005. If you are found to be operating these USTs during an inspection, KDHE will provide notice to the company that delivers regulated substances to your facility that such deliveries should cease until KDHE issues permits for your facility.

Below you will find listed the reasons why KDHE has determined that your USTs are out of compliance. You may contact KDHE if you have information that corrects KDHE's determination so your permits can be issued.

The tanks are out of compliance for the following reason(s):

KDHE has not received the latest results of your most current ALM, LLD, or MLD function test (s) for tank number(s): 001, 002, 003. Federal and KDHE regulations require the ALM, LLD, or MLD be tested annually.

Your current 2018/2019 UST permits will expire on July 31, 2019. If you plan on operating your USTs after July 31, 2019, you are required to bring your tanks into compliance with KDHE UST regulations to receive your 2019/2020 permits. If you have any questions concerning this letter or if you would like to discuss your options to bring your USTs into compliance, please feel free to contact the UST Program staff at 785-296-8061 or toll free at 1-877-221-0325.

Sincerely,

Marcus Meerian Environmental Program Administrator I Storage Tank Section

Re: Facility 30435 CASEY'S GENERAL STORE - #2826 2100 S. 4TH STREET LEAVENWORTH, KS 66048

TANKS: 001,002,003

Attention Underground Storage Tank Owner:

The purpose of this letter is to inform you that KDHE **has issued** your 2018/2019 UST Operating Permits for the underground storage tanks (USTs) at the facility referenced above. However, since the printing of your UST permits, the USTs have fallen out of compliance. KDHE will not print 2019/2020 UST Operating Permits until these USTs are brought back into compliance.

Not having UST Operating Permits places you in violation of K.S.A. 65-34,109 (b) (6) and the federal Energy Policy Act of 2005. If you are found to be operating these USTs during an inspection, KDHE will provide notice to the company that delivers regulated substances to your facility that such deliveries should cease until KDHE issues permits for your facility.

Below you will find listed the reasons why KDHE has determined that your USTs are out of compliance. You may contact KDHE if you have information that corrects KDHE's determination so your permits can be issued.

The tanks are out of compliance for the following reason(s):

KDHE has not received the latest results of your most current ALM, LLD, or MLD function test (s) for tank number(s): 001, 002, 003. Federal and KDHE regulations require the ALM, LLD, or MLD be tested annually.

Your current 2018/2019 UST permits will expire on July 31, 2019. If you plan on operating your USTs after July 31, 2019, you are required to bring your tanks into compliance with KDHE UST regulations to receive your 2019/2020 permits. If you have any questions concerning this letter or if you would like to discuss your options to bring your USTs into compliance, please feel free to contact the UST Program staff at 785-296-8061 or toll free at 1-877-221-0325.

Sincerely,

Marcus Meerian Environmental Program Administrator I Storage Tank Section

Re: Facility 30435 CASEY'S GENERAL STORE - #2826 2100 S. 4TH STREET LEAVENWORTH, KS 66048

TANKS: 001,002,003

Attention Underground Storage Tank Owner:

The purpose of this letter is to inform you that KDHE **has issued** your 2018/2019 UST Operating Permits for the underground storage tanks (USTs) at the facility referenced above. However, since the printing of your UST permits, the USTs have fallen out of compliance. KDHE will not print 2019/2020 UST Operating Permits until these USTs are brought back into compliance.

Not having UST Operating Permits places you in violation of K.S.A. 65-34,109 (b) (6) and the federal Energy Policy Act of 2005. If you are found to be operating these USTs during an inspection, KDHE will provide notice to the company that delivers regulated substances to your facility that such deliveries should cease until KDHE issues permits for your facility.

Below you will find listed the reasons why KDHE has determined that your USTs are out of compliance. You may contact KDHE if you have information that corrects KDHE's determination so your permits can be issued.

The tanks are out of compliance for the following reason(s):

KDHE has not received the latest results of your most current ALM, LLD, or MLD function test (s) for tank number(s): 001, 002, 003. Federal and KDHE regulations require the ALM, LLD, or MLD be tested annually.

Your current 2018/2019 UST permits will expire on July 31, 2019. If you plan on operating your USTs after July 31, 2019, you are required to bring your tanks into compliance with KDHE UST regulations to receive your 2019/2020 permits. If you have any questions concerning this letter or if you would like to discuss your options to bring your USTs into compliance, please feel free to contact the UST Program staff at 785-296-8061 or toll free at 1-877-221-0325.

Sincerely,

Marcus Meerian Environmental Program Administrator I Storage Tank Section

Re: Facility 30435 CASEY'S GENERAL STORE - #2826 2100 S. 4TH STREET LEAVENWORTH, KS 66048

TANKS: 001,002,003

Attention Underground Storage Tank Owner:

The purpose of this letter is to inform you that KDHE **has issued** your 2018/2019 UST Operating Permits for the underground storage tanks (USTs) at the facility referenced above. However, since the printing of your UST permits, the USTs have fallen out of compliance. KDHE will not print 2019/2020 UST Operating Permits until these USTs are brought back into compliance.

Not having UST Operating Permits places you in violation of K.S.A. 65-34,109 (b) (6) and the federal Energy Policy Act of 2005. If you are found to be operating these USTs during an inspection, KDHE will provide notice to the company that delivers regulated substances to your facility that such deliveries should cease until KDHE issues permits for your facility.

Below you will find listed the reasons why KDHE has determined that your USTs are out of compliance. You may contact KDHE if you have information that corrects KDHE's determination so your permits can be issued.

The tanks are out of compliance for the following reason(s):

KDHE has not received documentation of a financial assurance mechanism covering 3rd party property damage or personal injury claims for tank number(s): 001, 002, 003. Agency records indicate your insurance policy expired on 08-30-2018. KDHE requires annual documentation of most forms of financial responsibility, or proof of current 3rd Party Liability Insurance, which covers damage to property or injuries to people caused by releases from USTs.

Your current 2018/2019 UST permits will expire on July 31, 2019. If you plan on operating your USTs after July 31, 2019, you are required to bring your tanks into compliance with KDHE UST regulations to receive your 2019/2020 permits. If you have any questions concerning this letter or if you would like to discuss your options to bring your USTs into compliance, please feel free to contact the UST Program staff at 785-296-8061 or toll free at 1-877-221-0325.

Sincerely,

Marcus Meerian Environmental Program Administrator I

(1) Average Daily Amount assumed to be 1/2 of the Total Capacity unless otherwise stated.

(2) Assume storage of liquid substances is 365 days at the listed facility unless otherwise indicated.

(3) Please cross out any USTs removed from your facility. Check to see if your licensed remover has submitted a Underground Storage Tank Permanent Abandonment (UST008) form to KDHE.

\* Review what is listed, Fire (F), Chronic (C), Acute (A) to describe the tank contents. (This information is found on your MSDS sheets.)

If any of the above information is not correct, *such as the Owner's Mailing address* or any information related to the storage tanks system, provide a written description of any needed changes on this invoice and submit it with your payment. If an incorrect owner mailing address is listed and corrections are not made, your permit(s) may be delayed. FAILURE TO COMPLETE THIS INVOICE AND SUBMIT IT WITH THE APPROPRIATE FEES PRIOR TO APRIL 30, 2018 WILL PREVENT YOU FROM OBTAINING THE REQUIRED PERMITS BEFORE JULY 31, 2018.

April 10, 2018

Mr. Ed Haselwood 10975 Haselwood Inc 504 Applewood Drive. Manhattan KS 66503

# Re: Approved UST Repair Notification (UST009) Form: Casey's General Store #2826, 2100 S 4th, Leavenworth, KS 66048 (Fac. ID #30435)

Dear Mr. Haselwood:

I have reviewed and approved the "UST Repair Notification (UST009)" form for the underground storage tanks at the above referenced facility. The Notification reports work to replace the syphon jet on U003.

K.A.R. 28-44-15 (b) (1) authorizes Licensed UST Contractors to make repair applications by telephone if the repair is essential to protect public health and the environment. In addition to using the telephone, Contractors may make contact with KDHE by fax or email when a repair is deemed necessary. Should repairs be made during non-work hours or on the weekend, the Contractor must make contact with KDHE on the first workday following that repair. After notifying KDHE of the repair, Contractors may submit the Repair Notification (UST009) forms up to 30 days following the completion of the work.

Please complete and return the following forms, failure to do so is a violation of K.A.R. 28-44-15:

• "Underground Storage Tank Compliance Verification (UST004)" form to be filed after the work is completed. (Received 4/2/18)

KDHE has received the required forms and considers the application closed. Finally, if you have not already done so, arrange for a facility inspection with the nearest KDHE District Office. Thank you for your continued cooperation

Sincerely.

Matthew T. Kuffel Environmental Associate KDHE-BER-Storage Tank Section

Re: Facility 30435 CASEY'S GENERAL STORE - #2826 2100 S. 4TH STREET LEAVENWORTH, KS 66048

TANKS: 001,002,003

Attention Underground Storage Tank Owner:

The purpose of this letter is to inform you that KDHE **has issued** your 2017/2018 UST Operating Permits for the underground storage tanks (USTs) at the facility referenced above. However, since the printing of your UST permits, the USTs have fallen out of compliance. KDHE will not print 2018/2019 UST Operating Permits until these USTs are brought back into compliance.

Not having UST Operating Permits places you in violation of K.S.A. 65-34,109 (b) (6) and the federal Energy Policy Act of 2005. If you are found to be operating these USTs during an inspection, KDHE will provide notice to the company that delivers regulated substances to your facility that such deliveries should cease until KDHE issues permits for your facility.

Below you will find listed the reasons why KDHE has determined that your USTs are out of compliance. You may contact KDHE if you have information that corrects KDHE's determination so your permits can be issued.

The tanks are out of compliance for the following reason(s):

### KDHE has not received the latest results of your most current ALM, LLD, or MLD function test (s) for tank number(s): 001, 002, 003. Federal and KDHE regulations require the ALM, LLD, or MLD be tested annually.

Your current 2017/2018 UST permits will expire on July 31, 2018. If you plan on operating your USTs after July 31, 2018, you are required to bring your tanks into compliance with KDHE UST regulations to receive your 2018/2019 permits. If you have any questions concerning this letter or if you would like to discuss your options to bring your USTs into compliance, please feel free to contact the UST Program staff at 785-296-8061 or toll free at 1-877-221-0325.

Sincerely,

Marcus Allarian.

| (1) Average Daily Amou                                                          |                      |                      |                                                                              |                    |

(2) Assume storage of liquid substances is 365 days at the listed facility unless otherwise indicated.

(3) Please cross out any USTs removed from your facility. Check to see if your licensed remover has submitted a Underground Storage Tank Permanent Abandonment (UST008) form to KDHE.

\* Review what is listed, Fire (F), Chronic (C), Acute (A) to describe the tank contents. (This information is found on your MSDS sheets.)

If any of the above information is not correct, *such as the Owner's Mailing address* or any information related to the storage tanks system, provide a written description of any needed changes on this invoice and submit it with your payment. If an incorrect owner mailing address is listed and corrections are not made, your permit(s) may be delayed. FAILURE TO COMPLETE THIS INVOICE AND SUBMIT IT WITH THE APPROPRIATE FEES PRIOR TO APRIL 30, 2017 WILL PREVENT YOU FROM OBTAINING THE REQUIRED PERMITS BEFORE JULY 31, 2017.

## Re: Approved UST Repair Notification (UST009) Form: Casey's General Store #2826, 2100 S. 4<sup>th</sup> St, Leavenworth, KS 66048 (Fac. ID #30435)

Dear Mr. Haselwood:

I have reviewed and approved the "UST Repair Notification (UST009)" form for the underground storage tanks at the above referenced facility. The Notification reports work to replace the syphon jet on tank U003 and purge air from line.

K.A.R. 28-44-15 (b) (1) authorizes Licensed UST Contractors to make repair applications by telephone if the repair is essential to protect public health and the environment. In addition to using the telephone, Contractors may make contact with KDHE by fax or email when a repair is deemed necessary. Should repairs be made during non-work hours or on the weekend, the Contractor must make contact with KDHE on the first workday following that repair. After notifying KDHE of the repair, Contractors may submit the Repair Notification (UST009) forms up to 30 days following the completion of the work.

Please find enclosed an:

- "Underground Storage Tank Compliance Verification (UST004)" form to be filed after the work is completed. (Received March 18, 2016)
- ""Underground Storage Tank System Tightness Test (UST011)" (Waived 4/7/16, good test date on file)

KDHE has received the required forms and considers the application closed. Finally, if you have not already done so, arrange for a facility inspection with the nearest KDHE District Office. Thank you for your continued cooperation

Sincerely

Matthew T. Kuffel Environmental Associate KDHE-BER-Storage Tank Section

B. If the cathodic protection system has been repaired, a system test must be performed within six months of repair. Impressed current cathodic protection systems must also be inspected within sixty (60) days of repair. VI. Applicant's Certification: I certify that the information above is true to the best of my knowledge and that all equipment will be repaired in compliance with the manufacturers' repair instructions if applicable. The repair will be performed in compliance with all federal, state, and local regulations.

(1) Average Daily Amount assumed to be 1/2 of the Total Capacity unless otherwise stated.

(2) Assume storage of liquid substances is 365 days at the listed facility unless otherwise indicated.

(3) Please cross out any USTs removed from your facility. Check to see if your licensed remover has submitted a Underground Storage Tank Permanent Abandonment (UST008) form to KDHE.

\* Review what is listed, Fire (F), Chronic (C), Acute (A) to describe the tank contents. (This information is found on your MSDS sheets.)

If any of the above information is not correct, such as the Owner's Mailing address or any information related to the storage tanks system, provide a written description of any needed changes on this invoice and submit it with your payment. If an incorrect owner mailing address is listed and corrections are not made, your permit(s) may be delayed. Failure to complete this invoice and submit it with the appropriate fees prior to April 30, 2016 will prevent you from obtaining the required Permits before July 31, 2016.

## Re: Approved UST Repair Notification (UST009) Form: Casey's General Store #2826, 2100 S. 4<sup>th</sup> Street, Leavenworth, KS 66048 (Fac. ID #30435)

Dear Mr. Haselwood:

I have reviewed and approved the "UST Repair Notification (UST009)" form for the underground storage tanks at the above referenced facility. The Notification reports work to replace the syphon jet on the STP for Tank U003.

K.A.R. 28-44-15 (b) (1) authorizes Licensed UST Contractors to make repair applications by telephone if the repair is essential to protect public health and the environment. In addition to using the telephone, Contractors may make contact with KDHE by fax or email when a repair is deemed necessary. Should repairs be made during non-work hours or on the weekend, the Contractor must make contact with KDHE on the first workday following that repair. After notifying KDHE of the repair, Contractors may submit the Repair Notification (UST009) forms up to 30 days following the completion of the work.

Please find enclosed an:

 "Underground Storage Tank Compliance Verification (UST004)" form to be filed after the work is completed. (Received on 3/24/2015)

KDHE understands that the work is completed to the state standards; the Underground Storage Tank Compliance Verification (UST004) has been received for this job. <u>KDHE considers the notification closed</u> and no further action is needed at this time.

Please forward copies of all the forms to the Owner of the UST system you have repaired or upgraded as soon as the work is completed. Finally, if you have not already done so, arrange for a facility inspection with the nearest KDHE District Office. Thank you for your continued cooperation.

Mr. Ed Haselwood, 10975 February 3, 2016 Page 2 of 2

Sincerely,

Chitch Del Christopher L Eichman

(1) Average Daily Amount assumed to be 1/2 of the Total Capacity unless otherwise stated.

(2) Assume storage of liquid substances is 365 days at the listed facility unless otherwise indicated.

(3) Please cross out any USTs removed from your facility. Check to see if your licensed remover has submitted a

Underground Storage Tank Permanent Abandonment (UST008) form to KDHE.

\* Review what is listed, Fire (F), Chronic (C), Acute (A) to describe the tank contents. (This information is found on your MSDS sheets.)

If any of the above information is not correct, *such as the Owner's Mailing address* or any information related to the storage tanks system, **provide a written description of any needed changes on this invoice** and submit it with your payment. If an incorrect owner mailing address is listed and corrections are not made, your permit(s) may be delayed. Failure to complete this invoice and submit it with the appropriate fees prior to April 30, 2015 will prevent you from obtaining the required Permits before July 31, 2015.

# Re: Approved UST Repair Notification (UST009) Form: Casey's General Store #2826, 2100 S. 4<sup>th</sup> Street, Leavenworth, KS 66048 (Fac. ID #30435)

Dear Mr. Haselwood:

I have reviewed and approved the "UST Repair Notification (UST009)" form for the underground storage tanks at the above referenced facility. The Notification reports work to replace the syphon jet on the STP for Tank U003.

K.A.R. 28-44-15 (b) (1) authorizes Licensed UST Contractors to make repair applications by telephone if the repair is essential to protect public health and the environment. In addition to using the telephone, Contractors may make contact with KDHE by fax or email when a repair is deemed necessary. Should repairs be made during non-work hours or on the weekend, the Contractor must make contact with KDHE on the first workday following that repair. After notifying KDHE of the repair, Contractors may submit the Repair Notification (UST009) forms up to 30 days following the completion of the work.

Please find enclosed an:

• "Underground Storage Tank Compliance Verification (UST004)" form to be filed after the work is completed. (Received on 3/27/2014)

KDHE understands that the work is completed to the state standards; the Underground Storage Tank Compliance Verification (UST004) has been received for this job. <u>KDHE considers the notification closed</u> and no further action is needed at this time.

Please forward copies of all the forms to the Owner of the UST system you have repaired or upgraded as soon as the work is completed. Finally, if you have not already done so, arrange for a facility inspection with the nearest KDHE District Office. Thank you for your continued cooperation.

Mr. Ed Haselwood, 10975 October 8, 2014 Page 2 of 2

Sincerely,

Churche Lal

Re: Facility ID 30435 CASEY'S GENERAL STORE - #2826 2100 S. 4TH STREET LEAVENWORTH, KS 66048

**TANKS: 003** 

Attention Underground Storage Tank Owner:

The purpose of this letter is to inform you that KDHE will not issue your 2014/2015 UST Operating Permits for the underground storage tanks (USTs) at the facility referenced above. Either these USTs have fallen out of compliance since your 2013/2014 permits printed, or you have not received your 2013/2014 permits. KDHE will not issue new permits until these USTs are brought back into compliance.

Not having UST Operating Permits places you in violation of K.S.A. 65-34,109 (b) (6) and the federal Energy Policy Act of 2005. If you are found to be operating these USTs during an inspection, KDHE will provide notice to the company that delivers regulated substances to your facility that such deliveries should cease until KDHE issues permits for your facility.

Below you will find listed the reasons why KDHE has determined that your USTs are out of compliance. You may contact KDHE if you have information that corrects KDHE's determination so your permits can be issued.

The tanks are out of compliance for the following reason(s):

KDHE has not received the latest results of your most current ALM, LLD, or MLD function test (s) for tank number(s): 003. Federal and KDHE regulations require the ALM, LLD, or MLD be tested annually.

If you plan on operating your USTs, you are required to bring your tanks into compliance with the UST regulations to receive your 2014/2015 permits. If you have any questions concerning this letter or if you would like to discuss your options in bringing your USTs into compliance, please feel free to contact the UST Program staff at 785-296-8061 or toll free at 1-877-221-0325.

Re: Facility 30435 CASEY'S GENERAL STORE - #2826 2100 S. 4TH STREET LEAVENWORTH, KS 66048

TANKS: 003

Attention Underground Storage Tank Owner:

CASEY'S RETAIL COMPANY

PO BOX 3004, ONE CONVENIENCE BLVD

The purpose of this letter is to inform you that KDHE **has issued** your 2013/2014 UST Operating Permits for the underground storage tanks (USTs) at the facility referenced above. However, since the printing of your UST permits, the USTs have fallen out of compliance. KDHE will not print 2014/2015 UST Operating Permits until these USTs are brought back into compliance.

Not having UST Operating Permits places you in violation of K.S.A. 65-34,109 (b) (6) and the federal Energy Policy Act of 2005. If you are found to be operating these USTs during an inspection, KDHE will provide notice to the company that delivers regulated substances to your facility that such deliveries should cease until KDHE issues permits for your facility.

Below you will find listed the reasons why KDHE has determined that your USTs are out of compliance. You may contact KDHE if you have information that corrects KDHE's determination so your permits can be issued.

The tanks are out of compliance for the following reason(s):

## KDHE has not received the latest results of your most current ALM , LLD, or MLD function test (s) for tank number(s): 003. Federal and KDHE regulations require the ALM , LLD, or MLD be tested annually.

Your current 2013/2014 UST permits will expire on July 31, 2014. If you plan on operating your USTs after July 31, 2014, you are required to bring your tanks into compliance with KDHE UST regulations to receive your 2014/2015 permits. If you have any questions concerning this letter or if you would like to discuss your options to bring your USTs into compliance, please feel free to contact the UST Program staff at 785-296-8061 or toll free at 1-877-221-0325.

Sincerely,

Marcus Meerian Environmental Scientist IV Storage Tank Section

(1) Average Daily Amount assumed to be 1/2 of the Total Capacity unless otherwise stated.

(2) Assume storage of liquid substances is 365 days at the listed facility unless otherwise indicated.

(3) Please cross out any USTs removed from your facility. Check to see if your licensed remover has submitted a Underground Storage Tank Permanent Abandonment (UST008) form to KDHE.

\* Review what is listed, Fire (F), Chronic (C), Acute (A) to describe the tank contents. (This information is found on your MSDS sheets.)

If any of the above information is not correct, *such as the Owner's Mailing address* or any information related to the storage tanks system, **provide a written description of any needed changes on this invoice** and submit it with your payment. If an incorrect owner mailing address is listed and corrections are not made, your permit(s) may be delayed. Failure to complete this invoice and submit it with the appropriate fees prior to April 30, 2014 will prevent you from obtaining the required Permits before July 31, 2014.

## Re: Approved UST Repair Notification (UST009) Form: Casey's General Store #2826, 2100 S. 4<sup>th</sup> St, Leavenworth, KS 66048 (Fac. ID #30435).

Dear Mr. Haselwood:

I have reviewed and approved the "UST Repair Notification (UST009)" form for the underground storage tanks at the above referenced facility. The Notification reports work to install a new syphon jet on the STP for Tank U003.

K.A.R. 28-44-15 (b) (1) authorizes Licensed UST Contractors to make repair applications by telephone if the repair is essential to protect public health and the environment. In addition to using the telephone, Contractors may make contact with KDHE by fax or email when a repair is deemed necessary. Should repairs be made during non-work hours or on the weekend, the Contractor must make contact with KDHE on the first workday following that repair. After notifying KDHE of the repair, Contractors may submit the Repair Notification (UST009) forms up to 30 days following the completion of the work.

Please find enclosed an:

 "Underground Storage Tank Compliance Verification (UST004)" form to be filed after the work is completed. (Received on 5/6/2013)

KDHE understands that the work is completed to the state standards; the Underground Storage Tank Compliance Verification (UST004) has been received for this job. <u>KDHE considers the notification closed</u> and no further action is needed at this time. Mr. Ed Haselwood, 10975 May 9, 2013 Page 2 of 2

.

Please forward copies of all the forms to the Owner of the UST system you have repaired or upgraded as soon as the work is completed. Finally, if you have not already done so, arrange for a facility inspection with the nearest KDHE District Office. Thank you for your continued cooperation.

Sincerely,

Child Sel-Christopher L Eichman

(1) Average Daily Amount assumed to be 1/2 of the Total Capacity unless otherwise stated.

(2) Assume storage of liquid substances is 365 days at the listed facility unless otherwise indicated.

(3) Please cross out any USTs removed from your facility. Check to see if your licensed remover has submitted a Underground Storage Tank Permanent Abandonment (UST008) form to KDHE.

\* Review what is listed, Fire (F), Chronic (C), Acute (A) to describe the tank contents. (This information is found on your MSDS sheets.)

If any of the above information is not correct, *such as the Owner's Mailing address* or any information related to the storage tanks system, **provide a written description of any needed changes on this invoice** and submit it with your payment. If an incorrect owner mailing address is listed and corrections are not made, your permit(s) may be delayed. Failure to complete this invoice and submit it with the appropriate fees prior to April 30, 2013 will prevent you from obtaining the required Permits before July 31, 2013.

> Re: Facility ID 30435 CASEY'S GENERAL STORE - #2826 2100 S. 4TH STREET LEAVENWORTH, KS 66048

TANKS: 001,002,003

Attention Underground Storage Tank Owner:

The purpose of this letter is to inform you that KDHE will not issue your 2011/2012 UST Operating Permits for the underground storage tanks (USTs) at the facility referenced above. Either these USTs have fallen out of compliance since your 2010/2011 permits printed, or you have not received your 2010/2011 permits. KDHE will not issue new permits until these USTs are brought back into compliance.

Not having UST Operating Permits places you in violation of K.S.A. 65-34,109 (b) (6) and the federal Energy Policy Act of 2005. If you are found to be operating these USTs during an inspection, KDHE will provide notice to the company that delivers regulated substances to your facility that such deliveries should cease until KDHE issues permits for your facility.

Below you will find listed the reasons why KDHE has determined that your USTs are out of compliance. You may contact KDHE if you have information that corrects KDHE's determination so your permits can be issued.

The tanks are out of compliance for the following reason(s):

KDHE has not received satisfactory inventory control records for one month and/or satisfactory inventory control annual summary sheets covering an eight out of a 12 month period with the last two months being consecutive for tank number(s): 001, 002, 003.

If you plan on operating your USTs, you are required to bring your tanks into compliance with the UST regulations to receive your 2011/2012 permits. If you have any questions concerning this letter or if you would like to discuss your options in bringing your USTs into compliance, please feel free to contact the UST Program staff at 785-296-8061 or toll free at 1-877-221-0325.

Sincerely,

Marcus Meerian Environmental Scientist IV Storage Tank Section Phone: 785,296,1618 Fax: 785, 196,6180 Toroy, John Jackson, 196, 199

\* Review what is listed, Fire (F), Chronic (C), Acute (A) to describe the tank contents. (This information is found on your MSDS sheets.)

If any of the above information is not correct, *such as the Owner's Mailing address* or any information related to the storage tanks system, **provide a written description of any needed changes on this invoice** and submit it with your payment. If an incorrect owner mailing address is listed and corrections are not made, your permit(s) may be delayed. Failure to complete this invoice and submit it with the appropriate fees prior to April 30, 2011 will prevent you from obtaining the required Permits before July 31, 2011.

Re: Facility ID 30435 CASEY'S GENERAL STORE - #2826 2100 S. 4TH STREET LEAVENWORTH, KS 66048

TANKS: 001,002,003

Attention Underground Storage Tank Owner:

The purpose of this letter is to inform you that KDHE **has not issued** your 2010/2011 UST Operating Permits for the underground storage tanks (USTs) at the facility referenced above. Not having UST Operating Permits places you in violation of K.S.A. 65-34,109 (b) (6) and the federal Energy Policy Act of 2005. If you are found to be operating these USTs during an inspection, KDHE will provide notice to the company that delivers regulated substances to your facility that such deliveries should cease until KDHE issues permits for your facility.

Below you will find listed the reasons why KDHE has determined that your USTs are out of compliance. You may contact KDHE if you have information that corrects KDHE's determination so your permits can be issued.

The tanks are out of compliance for the following reason(s):

**KDHE** has not received satisfactory inventory control records for one month and/or satisfactory inventory control annual summary sheets covering an eight out of a 12 month period with the last two months being consecutive for tank number(s): 001, 002, 003.

KDHE has not received the required Annual Summary Sheets or satisfactory monthly monitoring reports for release detection covering an eight out of a 12 month period with the last two months being consecutive for tank number(s): 001, 002, 003. Current tank/line Monthly Monitoring release detection methods used: Interstitial Monitor Double Wall Tank, Automatic Tank Gauge.

If you plan on operating your USTs, you are required to bring your tanks into compliance with the UST regulations to receive your 2010/2011 permits. If you have any questions concerning this letter or if you would like to discuss your options in bringing your USTs into compliance, please feel free to contact the UST Program staff at 785-296-8061 or toll free at 1-877-221-0325.

Sincerely,

Michael J. Pome

Michael L. Pomes, L.G. Professional Geologist

(1) Average Daily Amount assumed to be 1/2 of the Total Capacity unless otherwise stated.

(2) Assume storage of liquid substances is 365 days at the listed facility unless otherwise indicated.

# (3) Please cross out any USTs removed from your facility. Check to see if your licensed remover has submitted a Underground Storage Tank Permanent Abandonment (UST008) form to KDHE.

\* Review what is listed, Fire (F), Chronic (C), Acute (A) to describe the tank contents. (This information is found on your MSDS sheets.)

If any of the above information is not correct, *such as the Owner's Mailing address* or any information related to the storage tanks system, **provide a written description of any needed changes on this invoice** and submit it with your payment. If an incorrect owner mailing address is listed and corrections are not made, your permit(s) may be delayed. Failure to complete this invoice and submit it with the appropriate fees prior to April 30, 2010 will prevent you from obtaining the required Permits before July 31, 2010.

Re: Facility ID 30435 CASEY'S GENERAL STORE - #2826 2100 S. 4TH STREET LEAVENWORTH, KS 66048

TANKS: 001,002,003

Attention Underground Storage Tank Owner:

The purpose of this letter is to inform you that KDHE will not issue your 2010/2011 UST Operating Permits for the underground storage tanks (USTs) at the facility referenced above. Either these USTs have fallen out of compliance since your 2009/2010 permits printed, or you have not received your 2009/2010 permits. KDHE will not issue new permits until these USTs are brought back into compliance.

Not having UST Operating Permits places you in violation of K.S.A. 65-34,109 (b) (6) and the federal Energy Policy Act of 2005. If you are found to be operating these USTs during an inspection, KDHE will provide notice to the company that delivers regulated substances to your facility that such deliveries should cease until KDHE issues permits for your facility.

Below you will find listed the reasons why KDHE has determined that your USTs are out of compliance. You may contact KDHE if you have information that corrects KDHE's determination so your permits can be issued.

The tanks are out of compliance for the following reason(s):

KDHE has not received satisfactory inventory control records for one month and/or satisfactory inventory control annual summary sheets covering an eight out of a 12 month period with the last two months being consecutive for tank number(s): 001, 002, 003.

KDHE has not received the required Annual Summary Sheets or satisfactory monthly monitoring reports for release detection covering an eight out of a 12 month period with the last two months being consecutive for tank number(s): 001, 002, 003. Current tank/line Monthly Monitoring release detection methods used: Interstitial Monitor Double Wall Tank, Automatic Tank Gauge.

Jun 29, 2010 Page 2

If you plan on operating your USTs, you are required to bring your tanks into compliance with the UST regulations to receive your 2010/2011 permits. If you have any questions concerning this letter or if you would like to discuss your options in bringing your USTs into compliance, please feel free to contact the UST Program staff at 785-296-8061 or toll free at 1-877-221-0325.

# Re: UST Temporary Operating Permit for Casey's General Store #2826, 2100 South 4<sup>th</sup> Street, Leavenworth, KS 66048 (Fac. ID 30435).

Dear Ms. Reams-Widder:

The Kansas Department of Health and Environment has issued a Temporary Operating Permit on Tanks U001, U002, U003 for the facility referenced above. This Temporary Operating Permit is valid between July 13, 2009, and November 13, 2009, and is included with this letter.

KDHE will extend the UST Temporary Permit for your facility after the following conditions are met:

 KDHE receives inventory control records for August or September 2009.
 The Automatic Tank Gauge with Line Monitors 90-Day Summary Sheet is due to KDHE by November 13, 2009.

Be sure to keep accurate inventory control records for your UST system.

If you have any questions or if I can be of assistance, please contact me at the number below. Thank you for your consideration.

Sincerely, A Meerian

# New Underground Storage Tank System Installation Application

(Petroleum Products and Hazardous Substances)

An application fee of \$20.00 per tank must accompany this application. This completed application form and installation plan(s) must be submitted to KDHE. a minimum of ten (10) days prior to the proposed installation date. KDHE USE ONLY: State of Kansas - Division of Environment Submit to: Kansas Department of Health and Environment Bureau of Environmental Remediation APPROVED Storage Tank Section When constructed to conform with Art. 44 Date: 1000 SW Jackson, Suite 410 Topeka, KS 66612-1367 Phone: 785-296-8061 Fax: 785-296-6190 Please Print Clearly or Type I. Facility Information A. Facility Name: B. Facility Address: 2100 simet) Reams-Wid 20 C. Contact Person: Ji [1] D. Legal Location: 2100 5 4th St County: Lew veni E. Qtr. Section: NE Corner of SUI QL \_ Township \_ **Q** Section 1 Range 22 - E (EW (circle one) F. New facility? ULS\_\_\_\_ Existing facility? \_\_\_\_\_ If existing, number of tanks already at this location: \_\_\_\_\_ G. Are tanks to be taken out of service due to this new installation? No X Yes How many? H. Will new tank(s) occupy old tank excavation? Yes \_\_\_\_\_ No \_X\_\_\_ If "Yes," how many? I. Have tank or line failures lead to this proposed new installation? Yes \_\_\_\_\_ No X and a If yes, to whom was the leak reported? J. If failures have occurred, please briefly describe the incident: 11. K. Is this facility in the State Trust Fund for environmental cleanup? No. Yes L. Number of monitoring devices already at this location: 1. Groundwater monitoring wells \_ \_\_\_\_\_ 2. Observation tubes: 3. Other (please describe): M. Is the facility located on Native American reservation or trust lands? Yes: No: X II. Tank Owner Information, aseu's General Stores The A. ## RE: Underground Storage Tank New Installation Casey's General Store #2826 (Fac. Id # TBA) 2100 South 4<sup>th</sup> Street Leavenworth, KS 66048

Dear Mr. Hankel:

I reviewed and approved the installation application for three new underground storage tanks at the above referenced facility on July 13, 2009. The enclosed "installation permit" is valid for 120 days from the date of this letter. If installation is delayed beyond 120 days, this approval shall be considered void, and a new application, supplemental documents, and additional permit fees will be required. Effective June 1, 2003, the 120-day installation permit will be issued in place of the 180 day "temporary operating permit." The installation permit is issued to the KDHE licensed contractor after payment of required fees and the application is submitted and approved by KDHE. Please notify KDHE in writing if the project is canceled.

A separate 120-day "temporary operating permit" will be issued to the owner when the installation is complete, and KDHE <u>has received the tank and line tightness tests</u> or other approved documentation of tightness. The "temporary operating permit" must be obtained prior to operating the tanks. Contact this office at (785) 296-8061 or toll-free (877) 221-0325 prior to the anticipated date of first use. There are various 3<sup>rd</sup> party approved methods of achieving verification of tank and line tightness. For approved tightness test methods, refer to the EPA list of Leak Detection Evaluations for Underground Storage Tanks or contact a KDHE licensed tightness tester.

The UST installer should contact our <u>Northeast District Office</u> at (785) 842-4600, at least five days prior to installation in order to schedule a facility inspection. If a tank removal is planned, the district office must be notified 30-days prior to removal.

## Responsibilities of the contractor include:

- ! Obtaining and displaying the KDHE "New Underground Storage Tank Installation Permit"
  - Using the KDHE form UST011 **"Underground Storage Tank System Tightness Test"** for reporting results of installation tightness tests to KDHE within 30 days of the test.
    - (An ATG leak test will only be substituted for a tightness test if it is performed according to 3rd party certification parameters and passes the tank at the 0.1 gph leak test with the tank as full as overfill devise allows.)
- ! Completing and signing page two of KDHE form UST007 "Notification with UST Compliance Verification."
  - Forwarding copies of KDHE form UST007 "Notification with UST Compliance Verification," to the Tank Owner for review as soon after the installation as possible with instructions to sign and forward it to KDHE within 30 days of operation.
  - Providing copies of the UST011 "Tightness Test" and the third party certification of release detection equipment to the owner.

#### <u>Responsibilities of the tank owner include:</u>

- Providing KDHE with the Certificate of  $3^{rd}$  Party Liability Insurance coverage (or equivalent) on the newly installed underground storage tank(s) prior to placing a regulated substance in the tank.
- Signing and completing the owner and facility information on page one of UST007 "Kansas Registration Notification with UST Compliance Information" form.
- Sending KDHE form UST007 "Notification with UST Compliance Information" form to KDHE within 30 days of putting the tank into use,
- Displaying the 120-day **Temporary Operating Permit** at the installation site, *and*
- ! Complying with release detection and inventory control reporting requirements.

The KDHE "annual UST operating permit" will be issued when KDHE receives all necessary forms, including the first 30 days of Inventory control records and the initial 90-day summary sheet of tank and line Release Detection. Please use the following address to send the information listed above:

## RE: Underground Storage Tank New Installation Casey's General Store #2826 (Fac. Id # TBA) 2100 South 4<sup>th</sup> Street Leavenworth, KS 66048

Dear Ms. Reams-Widder:

I reviewed and approved the installation application for the above referenced facility on July 13, 2009. This approval is valid for 120 days. Effective June 1, 2003, the contractor will be issued a separate "installation permit" This permit allows for <u>installation only</u> and does not allow for "operation" of the tanks.

#### • Responsibilities of the tank owner include:

- Obtaining a 120-day Temporary Operating Permit prior to operating the tanks. Call this office at (785) 296-8061 or toll-free (877) 221-0325 during business hours 3-5 days prior to the anticipated date of use. KDHE will issue a 120-day Temporary Operating Permit when 1) the installation is complete, and 2) KDHE has received the tank and line tightness tests or other approved documentation of tightness and 3) KDHE has received the certificate of 3<sup>rd</sup> party liability insurance or equivalent.
- Sending the signed "Notification with UST Compliance Verification" to KDHE within 30 days of putting the tank into use (obtain the completed KDHE form UST007 "Notification with "UST Compliance Verification" from your contractor, fill out the owner and facility information on the front and sign the "Notification" form.)
- Providing KDHE with the Certificate of 3<sup>rd</sup> Party Liability Insurance coverage (or equivalent) on the newly installed underground storage tank(s) prior to placing product in the tank(s),

Displaying the **120-day Temporary Operating Permit**\*\*\* at the installation site, <u>and</u>

DIVISION OF ENVIRONMENT Bureau of Environmental Remediation CURTIS STATE OFFICE BUILDING, 1000 SW JACKSON ST., STE. 410, TOPEKA, KS 66612-1367

Voice: 785-296-6372 Fax: 785-296-6190 email: mmeerian@kdhe.state.ks.us

http://www.kdheks.gov/ber/index.html Printed on Recycled Paper

## Ms. Jill Reams-Widder Page 2 July 14, 2009

- Complying with release detection and inventory control reporting requirements:
  - Begin **inventory control**. <u>You must provide</u> a copy of the first thirty days of inventory control to KDHE for verification after the first month of operation.
  - Begin monthly inventory control using your leak detection method.

\*\*\*Failure to hold and display a valid operating permit may lead to administrative action against the owner.

The annual KDHE UST operating permit will be issued when KDHE receives 1) the initial "<u>Inventory Control record</u>," and 2) the "<u>Notification with Compliance Verification</u>," from the owner, plus 3) the tank and line "<u>Tightness Test</u>" from the contractor.

Use the following address to send the information listed above: Kansas Department of Health and Environment Bureau of Environmental Remediation Storage Tank Section 1000 SW Jackson, Suite 410 Topeka, KS 66612-1367

An approval letter has also been provided to your KDHE licensed contractor. The UST installer has been instructed to contact our KDHE **<u>District Office</u>** at least 30 days prior to a removal of tanks and five days prior to installation in order to schedule a facility inspection.

## **Responsibilities of the KDHE licensed contractor include:**

Filling out the tank information on page one of the KDHE form UST007 - "Notification."

Completing and signing page two of KDHE form UST007 - "UST Compliance Verification".

- Using KDHE form UST011 "Underground Storage Tank System Tightness Test" for reporting results of tightness tests to KDHE within 30 days of the test. (An ATG must pass the tank at the 0.1gph leak rate according to 3<sup>rd</sup> party certification of equipment with the tank as full as overfill equipment will allow to be accepted as a tightness test)
- ! Certifying proper operation of release detection equipment and providing 3<sup>rd</sup> party certification of the equipment to the owner.
- Porwarding copies of the "Notification with UST Compliance Verification," to the Tank Owner as soon after the installation as possible with instructions to forward to KDHE.

Please note: this approval covers the KDHE "Storage Tank Section" requirements only and does not extend to local, county, municipal, or State Fire Marshal regulations. Contractors

# (POST THIS PERMIT IN A VISIBLE LOCATION)

THIS PERMIT WILL ALLOW ONLY THE <u>INSTALLATION</u> OF NEW UNDERGROUND STORAGE TANKS AT THIS FACILITY. THIS PERMIT AUTHORIZES A ONE-TIME DROP OF FUEL FOR TANK AND LINE TIGHTNESS TESTING ONLY.

TANK OWNERS MUST CONTACT KDHE TO OBTAIN A **"120-DAY TEMPORARY OPERATING PERMIT**" PRIOR TO PLACING THE TANKS IN SERVICE. TANK OWNERS MUST SUBMIT THE KDHE FORM UST007 – **"KS REGISTRATION NOTIFICATION with COMPLIANCE VERIFICATION"** TO KDHE **WITHIN 30 DAYS** OF THE INSTALLATION OF NEW UNDERGROUND STORAGE TANKS. TANKS NOT INSTALLED BY THE EXPIRATION DATE WILL REQUIRE A NEW APPLICATION.

## New Underground Storage Tank System Installation Application

(Peiroleum Producis and Hazardous Substances)

An application fee of \$20.00 per tank must accompany this application. This completed application form and installation plan(s) must be submitted to KDHE, a minimum of ten (10) days prior to the proposed installation date. KOHE USE ONLY: State of Kansas - Division of Environment Submit to: Kansas Department of Health and Environment Bureau of Environmental Remediation APPROVED Storage Tank Section When constructed to conform with Art. 44 Date: 7-13-09 1000 SW Jackson, Suite 410 Topeka, KS 66612-1367 Phone: 785-296-8061 Fax: 785-296-6190 Please Print Clearly or Type I. Facility Information A. Facility Name: ( B. Facility Address: 2 (simat) (city) (siata) (zin) C. Contact Person: Ja Phone: (5 Prim der

Utz D. Legal Location: 2100 S

Section \_\_\_\_\_ Township 9 E. Qtr. Section: NE Corner of SUI Q1 Range 22 - E (EW (circle one)

F. New facility?  $\underline{U}_{A} \leq \underline{U}_{A} \leq \underline{U$ 

H. Will new tank(s) occupy old tank excavation? Yes \_\_\_\_\_ No \_X\_\_\_ If "Yes," how many? I. Have tank or line failures lead to this proposed new installation? Yes No. Xanabar (Valuation)

If yes, to whom was the leak reported?

J. If failures have occurred, please briefly describe the incident:

K. Is this facility in the State Trust Fund for environmental cleanup? No. Yes L. Number of monitoring devices already at this location: 1. Groundwater monitoring wells 2. Observation tubes:

3. Other (please describe): M. Is the facility located on Native American reservation or trust lands? Yes: No: X

This completed application form and installation plan(s) must be submitted to KDHE in Topeka, a minimum of ten (10) days prior to the \*\*proposed installation date. Plans should document the location of the tanks, islands, dispensers, lines and vents, monitoring equipment, observation tubes, nearby structures, utilities, and property boundaries. Include a scale and north arrow. Please refer to the checklist below to assure that site plans are complete. Any changes to the proposed plans must be approved prior to installation. As-built drawings and the UST Compliance Verification must be submitted within 30 days of the completion of the installation. Copies of the submitted data should be provided to the facility owner.

Q.

٦

### V. If tank or line has failed, a release is suspected. To whom has suspected release been reported?

Please direct questions regarding tank and line tests to KDHE, Storage Tank Section, 785-296-8061.

TEST DATE:06/05/09 CLIENT:CASEY'S GENERAL STORES WORK ORDER NUMBER6329963

SITE: CASEY'S 2826

#### COMMENTS

Premium and diesel lines and leak detectors passed. Unleaded line and leak detector passed. The unleaded tank failed due to an air ingress above the product level. The product level was at 94.5" at the time of the test meaning the air leak was in the upper 24.5" of the tank. During the test, all risers were isolated down to tank top eliminating any tank top components. This included isolation of the vent and removal of the submersible pump. Recommend to uncover the tank top, inspect, repair, and re-test. Recommend to not fill the tank beyond the 94.5" of product that was present during the time of the test.

## **EXECUTIVE SUMMARY**

#### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

#### **RECORD SOURCES**

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

#### **RESEARCH SUMMARY**

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Environmental Works Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

#### Certified Sanborn Results: Certification # D983-4502-8FE9 PO# NA 9068 Project

#### UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Certification #: D983-4502-8FE9

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Resumes of Environmental Personnel Participating in this Environmental Assessment

# MANDY FLAGEOLLE

# **Project Manager**

## **EDUCATION/CERTIFICATIONS**

B.S., Geology and Geophysics, University of Missouri – Rolla, Missouri, 2003

Registered Professional Geologist: Missouri

ASTM Environmental Professional 2008 to Current

OSHA 40-hr HAZWOPER Certification

OSHA 8-hr Annual Refresher

**BNSF** Contractor Safety Training

**E-RAILSAFE** Certification

Certification in First Aid and CPR

## FIELDS OF SPECIALIZATION

- ASTM Phase I Environmental Site Assessments
- SBA Records Search with Risk Assessments
- ASTM Transaction Screens
- Limited Phase II Subsurface Investigations
- National Environmental Policy Act (NEPA) for telecommunication towers
- National Programmatic Agreement (NPA), Form 620/621 for telecommunication towers
- HUD Environmental Reviews under 24 CFR 58.6
- Project Management
- Account Management

## **EXPERIENCE SUMMARY:**

Ms. Flageolle has 16 years of environmental consulting experience. As a Registered Geologist in Missouri, she performs various duties including Phase I Environmental Site Assessments (Phase I ESAs), National Environmental Policy Act (NEPA) Reviews, and SBA Records Search with Risk Assessments (RSRA). Ms. Flageolle has also conducted Limited Site Investigations and stormwater sampling. Ms. Flageolle is an Environmental Professional (as defined in 40 CFR 312) for Phase I ESAs.

# **KEY PROJECT SUMMARY:**

- Conducted and managed over 800 Phase I ESAs ranging from undeveloped land, cellular towers, wind energy developments, multifamily residential structures, gasoline stations, multi-tenant shopping centers, research facilities, industrial facilities, automobile repair facilities, and office/commercial buildings. Conducted multiple Phase I ESAs to comply with HUD and SBA requirements. In conjunction with Phase I ESAs, managed client driven scopes providing site specific information on asbestos containing materials (ACM), mold, radon, leadbased paint, natural areas review, threatened and endangered species review, historic sites review, historic properties/archaeological resources review, and wetland reviews.
- Project Manager on telecommunications market buildout including multiple locations across Kansas and Missouri. Tasks included preparation for a multitude of raw land sites and co-locations of cellular equipment on telecommunication towers such as completion of Phase I ESAs, NEPA, National Programmatic Agreement (NPA), Form 620/621, asbestos containing materials (ACM) surveys, and lead-based paint (LBP) surveys..
- Project Manager for an urban Housing Authority project to conduct environmental reviews for 47 projects. Tasks included evaluating potential environmental impacts to determine if the project meets federal, state, and local environmental standards. Checklists were completed using the 24 CFR 58.6 including Airport clear zones, Endangered species, Environmental justice, Historic preservation, Noise abatement and control, and Site contamination.
- In conjunction with Phase I ESAs, Ms. Flageolle has conducted visual inspections of properties including multi-family residential structures, office buildings, retail malls, commercial developments, and heavy industrial sites in KS and MO.
- Conduct and manage LSIs in Kansas and Missouri. Responsibilities include preparation of work scopes, collection of soil and groundwater samples, preparation of samples for shipment to a laboratory for analysis, interpretation of analytical results, and preparation of client deliverables.
   Specific sites of concern have included impact by aboveground storage tanks (ASTs) and underground storage tanks (USTs).

### **EDUCATION/CERTIFICATIONS**

B.S. Biology Rockhurst University, 2016

OSHA 40-hr HAZWOPER Certification

Certified in First Aid and CPR

AHERA Certified Asbestos Inspector

Licensed Asbestos Inspector in Missouri, Kansas and Nebraska

### FIELDS OF SPECIALIZATION

- ASTM Phase I Environmental Site Assessments
- Asbestos Inspections
- Environmental Assessments for SBA Loans
- Site Characterization and Investigation
- Historical Research
- Hazardous Material Surveys
- Data Interpretation and Management
- Limited Phase II Subsurface Investigations
- Site Monitoring and Oversight
- Groundwater Sampling
- AutoCAD Engineer

# **Nicole Lounsberry**

## **Associate Scientist**

### **EXPERIENCE SUMMARY:**

Ms. Lounsberry is an Associate Scientist whose main responsibilities include conducting ASTM Phase I Environmental Site Assessments, asbestos inspections and AutoCAD assignments. Ms Lounsberry also has experience in hazardous material surveys, Phase II Environmental Site Assessments and oversight activities. Ms. Lounsberry has an educational background that includes knowledge of biological and environmental science as well as a history of independent research and field assessments.

### **KEY PROJECT SUMMARY:**

- Completed numerous Phase I ESAs which includes historical research, regulatory review, interviews and reconnaissance for large scale industrial manufacturing facilities, gas stations, automotive repair sites, multi-tenant commercial properties, residential and vacant sites throughout the Midwest. Ms. Lounsberry has experience conducting environmental assessments in Missouri, Kansas, Arkansas, Nebraska, Oklahoma, Illinois, Colorado, Texas, Florida, Oregon, North Carolina, Mississippi and Louisiana.
- Performed NESHAP, OSHA and AHERA compliant asbestos inspections on a variety of properties including multi-family and single-family residences, commercial spaces and industrial buildings within Missouri and Kansas. Inspections include sampling of suspect materials, quantification and mapping. Ms. Lounsberry produces reports with follow up recommendations based on client requests.
- Assisted in Phase II ESA activities including direct-push soil and groundwater sampling,.
- Assisted in the oversight of field operations of a large scale lead remediation EPA Superfund site that covered approximately 3 square miles of residential properties.
- Completing projects under short deadlines, enabling clients to make informed decisions regarding environmental risk.
- Completing detailed AutoCAD assignments and adjustments for various projects including Phase I ESAs, Limited Phase II Subsurface Investigations and long-term monitoring projects often under short deadlines.
